

NPSTC

National Public Safety Telecommunications Council

Share What You Know with the Public Safety Telecommunications Community

Volunteers Needed for the Technology Education Working Group

The Technology Committee is looking for volunteers to participate with the Technology Education Working Group, formed to ensure the public safety and public service communities are aware of the latest technological development, deployment, standardization, and regulation.

NPSTC's participants run the gamut from first responders to policymakers to experts in technology. Share your knowledge with the community on the latest technological developments such as LTE; your deployment of 4.9 GHz technology; new developments in P25; or what the latest FCC regulation will mean to those in the field. Help us explain these topics or suggest some of your own.

Visit the Technology Education Working Group's [Resource Web Page](#) which includes documents such as Understanding the FCC; Land Mobile Radio (LMR) and 101 Next Generation (NG) 9-1-1. A backbone detailing the historical activities in the 700 MHz band is coming soon.

If you'd like to participate in the Technology Education Working Group and provide input which will benefit the public safety and public service communities, please use the form below to volunteer. You will be contacted with the information for the next meeting and additional information regarding the Technology Education Working Group.
